ANANDRATHI

28<sup>th</sup> February, 2021

# **Objective**

Focus on Return Optimization by investing in multicap portfolio of rising enterprises with sound corporate track record and sustainable business model keeping balance between value and growth strategy.

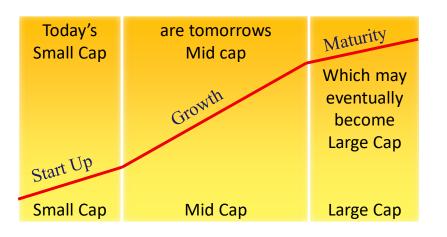

Value investing is the art of buying stocks which trade at a significant discount to their intrinsic value. Portfolio Manager achieve this by looking for companies on cheap valuation metrics, typically low multiples of their profits or assets, for reasons which are not justified over the longer term. Growth investing is a style of investment strategy focused on capital appreciation. Portfolio Manager invest companies that in exhibit signs of aboveaverage growth, even if the share price appears expensive in terms of metrics such as price-toearnings or price-tobook ratios.

# IMPRESS PMS ANANDRATHI

- The table shows <u>outperformance</u> of the Mid Cap and Small Cap Index over the Sensex Index during the <u>Bull Period.</u>
- Outperformance of the Mid Cap and small caps happens because of <u>better earnings growth</u> in the bull phase.
- The <u>P/E</u> for Mid cap and Small Caps also <u>expands</u> as earnings growth is superior v/s Sensex earnings growth.
- Identifying the business within attractive valuation compare to their growth is key factor for outperformance.
- Returns delivered from Mid Cap and Small Cap do outperform the Large Cap, however one should keep in mind the risk associated with it as we see the <u>higher volatility</u> in it. Therefore we emphasis on <u>stringent stock selection</u> strategy and create a diversified Multicap portfolio to create alpha over the benchmark.
